

ELDEN RING

ELDEN RING TIPS & TRICKS!

INTRO

Elden Ring which has been developed by FromSoftware is an action role-playing game. It has been published by Bandai Namco Entertainment. Throughout the game the main idea is to watch the enemy, learn it's patterns and attack when it is safe.

The game is centred around a powerful artefact, Elden Ring which has been shattered and sent into different regions of the world. The main objective in the game is to find the shards of the ring and restore it to its original state. And as a result, become the Elden Lord.

BEST STARTING CLASS

The starting classes and their stats available in the game are as follows:

BEST WEAPONS DURING EARLY STAGES

- **Flail:** This weapon is really strong. Using this weapon for consecutive hits will build up bleed damage and will slice off a good part of the enemy's health bar as they each a level of blood loss.
- **Battle Hammer:** A good weapon to pick up if you are looking for a hefty weapon. It is the go to weapon in the early stages of the game for a player, trying to make an impact with their swings.
- **Great Épée:** This weapon is a good choice for those who prefer weapons with a focus on pushing and thrusting enemies instead of swiping. However, this weapon is not a good choice for a large group of enemies.
- **Uchigatana:** This weapon is an upgraded version of the Flail. It is a stronger weapon which allows the player to pull off powerful heavy attacks. In addition to this, it also offers more range.

GENERAL TIPS
